

She Does Things Carefully Now

Native Text Ad Script Brief — Facebook • 4-in-1 Shoulder Therapy Belt • hearthealthco.com.au

1. SUMMARY CARD

Format	#46 Text, long-form (~1,400-2,200 words)
Type	NEW (new concept using winning DNA structure)
Angle	The Partner's Eyes — pain told through a RELATIONSHIP lens (he notices, she sees him noticing)
ICP	The Watched Partner
Sophistication	Stage 3 — New Mechanism
Risk Level	Lower Risk
Product	4-in-1 Shoulder Therapy Belt (\$149.99 AUD)
Mechanism	Deep Tissue Reset (adapted for shoulder)
Source DNA	AD 2 "The 14 Month" — 30 purchases, 4x ROAS
LP Persona	Dr. David Sime (22 years experience)
Guarantee	30-day money-back

2. THE JOB

What this concept tests: A new emotional entry point. This ad is about shoulder pain, but the door the reader walks through is BEING WATCHED. The concept tests whether pain told through a RELATIONSHIP lens converts better than pain told through a personal-experience lens.

Hypothesis: A reader whose partner has commented on how carefully she moves will feel this ad in a way that no "my shoulder hurts" ad can match. The pain becomes a relationship story, not a medical story.

3. WHO'S READING

Target: The Watched Partner. Age 48-68, shoulder pain has changed her movement patterns enough that someone close to her has noticed. She is not immobile. She is CAREFUL.

Emotional state: Vulnerable but hiding it. Being watched makes her feel fragile.

Key difference: AD 2's reader is facing a MEDICAL crisis. This reader is facing an EMOTIONAL one.

4. THE ANGLE

Pain cluster: Relationship impact of chronic pain. The emotional burden of being watched and seen as fragile.

Customer Language: "He said I do everything carefully now. I didn't even notice I was doing it. But he did."

What makes this different: AD 2 enters through surgery. HIP-NEW-25 through failed products. HIP-NEW-11 through daily humiliation. THIS concept enters through SOMEONE ELSE'S observation.

5. THREE HEADLINE OPTIONS

OPTION A — "THE OBSERVATION"

"My husband said something last week that stopped me. 'You do everything so carefully now.'"

Hook type: Intimate Confrontation

OPTION B — “THE FLINCH”

“I reached for a cup on the top shelf. My husband flinched. He flinched before I did.”

Hook type: Reversal + Intimate Detail

OPTION C — “THE WATCH”

“He doesn’t say anything anymore. He just watches. And I can feel him watching.”

Hook type: Silence + Emotional Tension

6. BODY DIRECTION

Story Shape: Linear narrative, first-person. ~1,400–2,200 words. The PARTNER is the emotional mirror.

Scenes:

The Observation The moment he says it. Her reaction. The gap between “I’m fine” and what she feels.

The Inventory She starts noticing what he’s been seeing. The other hand. The doors. An inventory of small surrenders.

The Watching He watches. Taking the mug off the shelf before she reaches. Small acts of accommodation. Each one lands like a verdict.

The Silent Fight She tells him to stop. The fight ends without resolution because the pain is the problem.

The Discovery Through someone whose partner made a similar observation. Discovery through the relationship channel.

The Mechanism The soft tissue explanation. The blood supply issue post-menopause. The inflammation loop.

The Results The first change is not the pain. It is that he stops watching. She reaches and he does not flinch. Results measured in relationship moments.

The Echo She reaches for the mug. He does not move. The most powerful transformation is the one that becomes invisible.

7. THE MECHANISM

Name: “Deep Tissue Reset” (adapted for shoulder)

Current belief: “My shoulder is just getting worse. This is permanent.”

Reframe: Soft tissue around the shoulder joint, inflamed and restricted. Rotator cuff tendons starved of blood supply post-menopause. Inflammation loop.

Why nothing worked: Anti-inflammatories quiet the alarm. Physio loads angry tendons. Cortisone numbs temporarily. Ice on the surface. None reach the deep tissue layer. Not wrong. Shallow.

What actually works: Red light (660nm) + near-infrared (850nm) + heat + vibration + compression. Four modalities together.

New belief: “It was not permanent. It was tissue nobody was treating. And now he has stopped watching me move.”

8. BEAT-BY-BEAT GUIDANCE

BEAT	STATUS	DIRECTION	WHY
1. Hook	ADAPT	Relationship entry. Open with the partner’s observation.	AD 2’s hook is personal contradiction. This works through relationship observation.

2. Credential	CHANGE	New narrator. Woman, 52-65, long-term relationship (20+ years).	Relationship story that involves shoulder pain.
3. Personal Crisis	CHANGE FRAMING	The crisis is being SEEN in pain. The gap between "I'm fine" and what he sees.	She was managing until he said something.
4. Pattern	ADAPT	The medical system treats it as "just inflammation." Nobody measures the emotional weight of being watched.	The RELATIONSHIP impact is never addressed.
5. Lies / Myths	KEEP ABSENT	No myth-busting section. Myths implicit in failed attempts.	Would break the intimate narrative voice.
6. Failed Attempts	ADAPT	The compensations: the other hand, the lower shelf, the front-close bras. Quiet adaptations her partner can see.	Not products that failed. Quiet accommodations.
7. Emotional Low	ADAPT	He reaches for something BEFORE she does. Being pre-empted by love.	Being accommodated is devastating proof of fragility.
8. Bridge / Discovery	CHANGE	Through someone whose partner made a similar observation. "My husband said the same thing to me."	Emotional bridge is shared experience of being watched.
9. Mechanism Intro	KEEP	Deep Tissue Reset. Why the restriction developed. Not structural deterioration but inflamed, starved soft tissue.	Transition from emotional story to understanding.
10. Current Belief	ADAPT	"My shoulder is just getting worse. And he can see it getting worse."	Both medical and emotional.
11. Reframe	KEEP	Soft tissue. Rotator cuff tendons starved. Inflammation loop. Treatable. Not permanent.	Core reframe works.
12. Why Nothing Worked	KEEP	Anti-inflammatories, physio, cortisone, ice — none reach deep tissue. Not wrong. Shallow.	Validates her experience.
13. What Actually Works	KEEP	Red light 660nm + near-infrared 850nm + heat + vibration + compression.	Proven mechanism.
14. Product Intro	ADAPT	The belt arrives through the friend, the moment she decided compensations were not enough.	Natural discovery. Let it appear.
15. Social Proof	ADAPT	Dr. David Sime (22 years). Other women whose partners noticed. A community of women who have been watched.	Community, not customer reviews.
16. Results	ADAPT	He stops watching. She reaches and he does not flinch. Results measured in relationship moments.	Transformation is relational.
17. Future Pacing	ADAPT	She reaches for the mug. He does not move. Her movement becomes unremarkable again.	Return to invisibility is highest form of healing.
18. Risk Reversal	KEEP	30-day money-back. "If the watching does not stop, send it back."	Emotional language, not transactional.
19. CTA	ADAPT	"Move like nobody is watching. Because soon, nobody will need to." Link to hearthealthco.com.au/pages/sb1 .	The CTA should feel like an exhale.

9. PERSONA & VOICE

Narrator: New narrator, not from any existing ad. Age 54-64, long-term marriage (20+ years).

Voice: More emotionally exposed. She is telling a relationship story that involves pain. Vulnerability is the tone.

What she sounds like: A woman telling a friend something she hasn't told anyone else. Quiet. Honest. A little raw.

What she does NOT sound like: A testimonial. A product reviewer. She is sharing an experience.

SH-NEW-27 — PRODUCTION DELIVERABLES	
Concept	She Does Things Carefully Now
Type	NEW
Format	#46 Text, long-form (~1,400–2,200 words)
Product	4-in-1 Shoulder Therapy Belt • \$149.99 AUD
POV	First person, woman narrator (age 54–64)
Tone	Emotionally exposed, vulnerable, relationship-centred
Page	Maggie Smith
Destination URL	hearthealthco.com.au/pages/sb1
Mechanism	Deep Tissue Reset (adapted for shoulder)
Key Specs	Red light 660nm + Near-infrared 850nm + Heat + Vibration
Guarantee	30-day money-back
LP Persona	Dr. David Sime (22 years experience)
Source DNA	AD 2 “The 14 Month” — 30 purchases, 4x ROAS
Risk Level	Lower Risk
